SUBJECT INDEX TO VOLUME 3

Boiling on free-falling spheres: drag and heat transfer coefficients, 185

Condensation heat transfer enhancement by ridges on integral fin surfaces, 341
Convection:
  forced:
    boiling with refrigerant 12, void fraction measurement in subcooled, 323
    heat and mass transfer from complex surfaces, 83
    natural and, of Freon-113, film boiling heat transfer from a sphere in, 129
  mixed:
    flow in a rectangular channel, effect of orientation on solidification for, 377
    heat transfer from an array of discrete sources in a horizontal rectangular channel with and without surface augmentation, measurement of, 215
  natural:
    and forced convection of Freon-113, film boiling heat transfer from a sphere in, 129
    in binary gases due to horizontal temperature and vertical concentration gradients, the nature of, 301
  thermal:
    heat transfer in a horizontal concentric annulus partially filled with water, an experimental study of, 289

Evaporation of single liquid drops in an immiscible liquid: experiments with *n*-Pentane drops in water and preparation of new heat transfer correlations, 159

Gas-filled double-pane windows, infrared radiation of SF_2 and its application to, 65

Highly accurate pipe flow enthalpy difference meter, 1

Melting Phenomena from a constant heat flux vertical plate, experimental studies of, 49

Nucleate film boiling for an R22/R114 mixture and its components, visualization of, 447
Nucleate boiling from a tube, influence of fluid flow on, 101

One-side-heated evaporator tubes, heat transfer in vertical and horizontal, 397

Polymerizing fluids, rheokinetics effect on flow and convective heat transfer of, 9
Pressed metal powder materials, thermal conductivity of, 149

Radiation thermometry of silicon wafers in a diffusion furnace with rod-type and prism-type optical guides, 371

Single vapor bubble into subcooled water, condensing phenomena of a, 173

Temperature distributions in glass plates with a highly reflective, opaque surface, 427
Thermosyphon in melts inside a composite heat exchanger tube, characteristics and flow visualization of a, 355
Turbulent rough-wall boundary layer, comparison of constant wall temperature and heat flux cases for the, 117
Two-phase natural circulation loop, an experimental study of the heat transfer performance of a rectangular, 27

Vertical wall fires, radiative and total heat feedback from flames to surface in, 411
Void formation:
for cylindrical geometries, solidification, 257
in unidirectional solidification, 239
